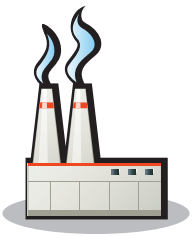
Crossword Puzzle

gas smart!
teaching kids to conserve

Now, let's learn how natural gas is delivered to your home, your school and businesses in your community.

The words for the puzzle can be found in the Gas Smart Maze, Word Search and Match Game.



First, (5 down) is brought up to the surface of the (2 down). To get it to work with appliances in your (1 across), it needs to be cleaned and processed. (4 down)—tubes that are many miles long—carry natural gas underground to towns across the country. Because natural gas is odorless and colorless, natural gas companies add a scent like (6 across) to help detect (3 down) and keep us safe.

An energy source that does not get replaced after we use it is a called a (5 across) energy source. So, it's very important that we (7 across) energy and use less natural gas. We don't want to run out, do we?
