

## Fill In The Blank

Let's explore various ways to conserve energy at home. Talk with your parents, brothers and sisters about these ways to save natural gas and be Gas Smart.

Fill in the blank with the correct word from the list below.

water  
showerhead  
air filter

thermostat  
clothes dryer  
oven door

- 1) Remember to cover pots when cooking. Also, keep the \_\_\_\_\_ closed as much as possible when in use.
- 2) It takes energy to heat water, so take shorter showers or baths. A water-saving \_\_\_\_\_ helps conserve, too.
- 3) In winter, turn down your \_\_\_\_\_ to 68° F during the day and 55° F at night.
- 4) Natural gas is needed to heat your \_\_\_\_\_, so choose cold or warm when using your clothes washer to conserve energy.
- 5) Installing a clean \_\_\_\_\_ on your heating system can save energy (and natural gas).
- 6) Clean the \_\_\_\_\_ lint filter before each load to improve air flow.
