

Receive a home assessment, your way

Two ways to receive a free home assessment:

In-Home Assessment: Our energy advisor will arrive wearing a mask, safety gloves and identification. The advisor will perform an assessment inside your home and install free energy-saving products.

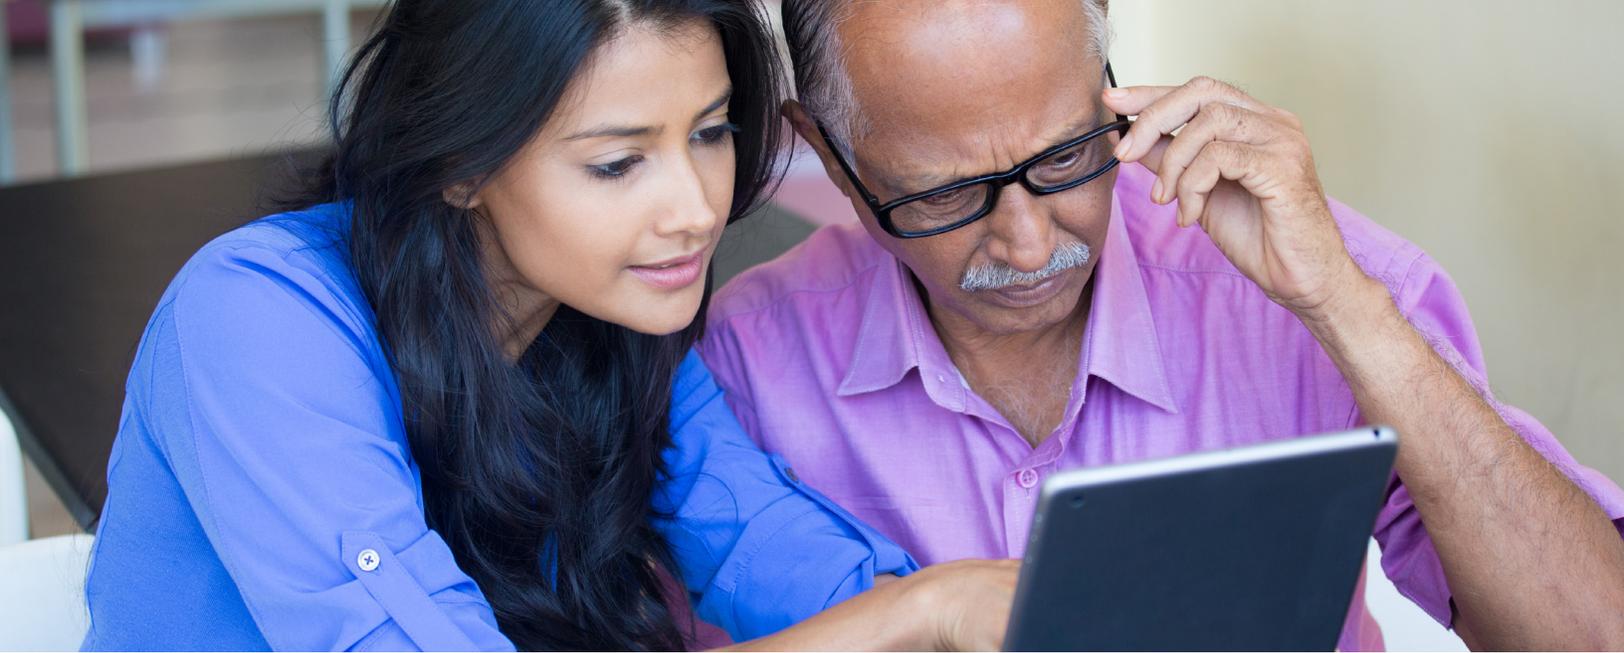

Virtual Home Assessment: Our energy advisor will guide you virtually through an interactive walk-through using video-sharing software. After your assessment, free energy-saving products will be delivered to you, so you can install them throughout your home.

Both experiences are designed to help you reduce your energy use, save money, increase comfort and receive energy-saving products—at no cost to you.

[See back to compare the benefits included with each home assessment option.](#)

Choose the **FREE** energy-saving experience that works best for you
